

Energy Efficient Holiday Lighting

LEDs are now on par with traditional bulbs. Gone are the days when LED holiday lights were known for a harsh white light or stark colors that created a less-than-magical atmosphere. These days, LEDs come in warm, inviting colors in a variety of light beam patterns and dimming speeds, giving you lots of creative options for decorating. LEDs last longer than traditional lights. In fact, they have an operational life span of about 20,000 hours, enough to last for 40 holiday seasons. Also, the lights don't have glass or filaments, which makes them durable and resistant to breaking. And because LED bulbs are so strong, one individual outage generally doesn't darken the whole strand.
