NOTE 1: Part number may change due to number of space and bus provided. For example, (816) means 8 double pole or 16 single pole breakers.

NOTE 2: All Lugs are to be sized for 350 MCM or less, unless specified elsewhere. It is the member's responsibility to provide all lug kits to terminate the number of cables per-phase that DEC is extending from the transformer.

NOTE 3: DEC reserves the right to modify this list at anytime. Members should submit cut-sheets to ensure the meter socket is acceptable before purchase. **Offset meter pans will not be accepted.**
